PROVA SCRITTA DEC 15/7/2015  ESERCITIO 3
twice: 'a -> 'a list -> bool
Tale cle twice x xs = True se x occarre esattamente 2 volte in xs, false altiment
CON RICORSIONE ESPRICTRA
let Twice x xs =  let Twice x xs =  let rec conta y ys =  match ys with
$\begin{array}{c} () \rightarrow 0 \\ \downarrow 2::2s \rightarrow if \ 2=y \ Then \ 1+(conta \ y \ 2s) \\ else \ conta \ y \ 2s \end{array}$
$in$ $conta \times xS = 2$ ;
VERSIONE PIU EFFICIENTE CHE SI FERMA NON APPENA TROVA 3 COPIE DECL'ECEMENTO

Cet Twice x xs = let contan n y ys = match (n, ys) with  $(0,[]) \rightarrow T_{nue}$ (m, ()) when m > 0 -> false V (O, ≥::25) → if z=g Then folse else contan D y 25 (m, 2::2s) when m>0 -> if z=y Then Contan m-1 y 25 else contan m y 25 im contan 2 x xs;
